

Westchester Community College

State University of New York

PROGRAM MISSION STATEMENT

The mission of the Radiologic Technology Program is in keeping with that of the College, to prepare competent entry-level radiographers to gain employment in various health facilities. This preparation includes promoting a high standard of clinical practice, ensuring safe radiation practice and committing to patient safety and comfort with quality of care. In fulfillment of this mission, Westchester Community College affirms these goals and student learning outcomes: (6/09) (6/10)

PROGRAM GOALS

Goal 1 - Students will function as entry level technologists

Student Learning Outcomes:

- Students will apply appropriate technical factors
- Students will apply safe radiation protection
- Students will apply appropriate positioning skills
- Students will apply appropriate patient care skills

Goal 2 - Students will think critically and analytically in clinical practice

Students Learning Outcomes:

- Students will function effectively in critical situations (trauma)
- Students will function in non-routine situations

Goal 3 - Students will adhere to the ethical and social values of the profession

Student Learning Outcomes:

- Students will use the Code of Ethics to guide their professional conduct.
- Students will demonstrate ethical conduct in clinical practice
- Students will develop career awareness

Goal 4 - Students will use effective communication skills

Student Learning Outcomes:

- Students will demonstrate age appropriate communication skills (pediatrics and geriatrics)
- Students will develop oral and written communication skills
