Completed credits

of 27 required

NOTES:

The Cybersecurity certificate provides students with a firm foundation in the basic principles of business security. It is recommended for individuals with prior computer experience, and designed for students who need to enhance their job skills. The courses can also be applied to the A.A.S. degree in Computer Security and Forensics. Graduates of this certificate can expect opportunities to use their skills in private industry, government, law enforcement, the military, health services and academia.
